

## TGA2BG BUILD INSTRUCTIONS

TGA2BG is using the SDL library for creating the framebuffer window which displays pictures preview. Please visit <http://www.libsdl.org/> for more info.

### Win32 (mingw)

gcc version 3.4.5 (mingw-vista special r3)  
SDL-1.2.14 built with --disable-stdio-redirect

### MacOSX

gcc version 4.0.1 (Apple Computer, Inc. build 5370)  
SDL universal libraries are provided and thus no SDL install is required.

### Unix/other

Any OS with an ANSI C compiler w/ SDL installed should work fine.

```
tar -xvzf tga2bg_030310.tar.gz  
cd tga2bg_030310  
./make.sh
```
